PROFESSIONAL SUMMARY

I'm a PHP Laravel developer with 4+ years of hands-on experience building and maintaining web applications. Skilled in PHP, Laravel, Livewire and MySQL, with basic knowledge of React.js, Vue.js and the Django framework. I'm passionate about writing clean, efficient code and always eager to take on new challenges that help me grow as a developer.

PROFESSIONAL EXPERIENCE

Laravel Developer · Pentasoft professional 05/2022 — Present

- Working with designers, Front End and project management staff to capture requirements for functional elements of website projects.
- Liaising with clients and ensuring all work complies with standards and guidelines.
- Working on project estimates and implementing code based on specifications.
- Setting up and creating new tables within MySQL.
- Improvement of system architecture by refactoring old legacy code to the latest technology.
- Live projects on cPanel and AWS (Amazon Web Server).

EDUCATION

Punjabi University Patiala 05/2017 — 07/2019
Bachelor of Commerce Application (B.C.A) — Computer Applications

Punjab School Education Board (P.S.E.B) 03/2015 — 06/2016
Intermediate

Punjab School Education Board (P.S.E.B) 06/2017 — 04/2018
High School

PROJECTS

Multi-Tenant SaaS Payment Gateway Platform (Laravel + Livewire + MySQL) 2025

- Designed and developed a scalable multi-tenant SaaS payment gateway system with domain/subdomain-based tenant isolation and separate databases per tenant.
- Implemented Super Admin panel to manage tenants, configure payment gateways, and assign gateways to tenants or users.
- Built tenant-level admin features to manage users, set custom transaction charges, and define charge slabs.
- Integrated dynamic payment routing so transactions map to the assigned gateway and fee structure.
- Engineered backend with Laravel and Livewire for reactive interfaces and seamless real-time updates.
- Optimized MySQL for high concurrency with connection pooling; ensured secure isolated storage per tenant.
- Tech Stack: Laravel, Livewire, MySQL, Multi-Tenancy, REST APIs, Payment Gateway Integration.

Composer Package Developer — backup-auto-detect-database (Open-Source) 2025

- Developed a Laravel Composer package that auto-detects if the project uses MySQL or MongoDB, triggers a full database backup, and uploads it to Google Drive.
- Added config-driven features like local backup cleanup, scheduler-based automation, and simple .env setup.
- Supports Laravel 9–12 and PHP 8.1+, published on Packagist for easy install.
